

Netronic Visual Jobs Scheduler

The planning board for planning jobs in Dynamics 365 Business Central

NETRONIC has been the specialist for software for graphical planning since 1975. The solutions are always based on individual Gantt charts and are offered by more than 200 partners worldwide.

A Gantt chart is a proven tool for gaining operational agility through the visual management of time and resource-centric planning data. NETRONIC has been operating this 'craft' for more than 30 years – industry-proven, focused and with a high level of commitment for the success of the customers.

YOUR CHALLENGE WITHOUT THE ADD-ON

To remain competitive, it is particularly important that your project planning is transparent and easily adaptable. You should always have a complete overview.

Is this the case in your company? Can you answer the following questions quickly by taking a look into your system?

- Can I meet the promised deadline?
- How does a short-term change affect the entire planning?
- Where do I have free capacities?
- Which project tasks are due in the near future?

THE SOLUTION: NETRONIC VISUAL JOBS SCHEDULER

Extend the Project module of Microsoft Dynamics 365 Business Central/NAV with Gantt charts for project and resource planning and control your projects and resources via drag and drop.

The Visual Jobs Scheduler is fully integrated with the Dynamics 365 Business Central/NAV Project and Resource module. Use it to control the following parameters:

- ✓ projects
- ✓ project tasks
- ✓ project plan lines
- ✓ resources

It doesn't take long to install. Thus, the add-on augments the standard and no existing objects need to be changed. In addition, it can be used without training.

COMPARISON: NETRONIC VISUAL JOBS SCHEDULER VS. SYSTEM STANDARD

<i>Criterion</i>	<i>System standard</i>	<i>Netronic Visual Jobs Scheduler</i>
