

Netronic Visual (Advanced) Production Scheduler

Graphical planning board for your production in Dynamics 365 Business Central

NETRONIC has been the specialist for software for graphical planning since 1975. The solutions are always based on individual Gantt charts and are offered by more than 200 partners worldwide.

A Gantt chart is a proven tool for gaining operational agility through the visual management of time and resource-centric planning data. NETRONIC has been operating this 'craft' for more than 30 years – industry-proven, focused and with a high level of commitment for the success of the customers.

YOUR CHALLENGE WITHOUT THE ADD-ON

In order to remain competitive, it is particularly important that planning – especially production planning – runs optimally. At best, you have an overview of all orders, resources and capacities at all times.

Is this the case in your company? Can you quickly answer the following questions by taking a look into your system?

- When is which employee scheduled where?
- When is which machine scheduled with which process?
- Where do I have free capacities?
- Can I meet the promised deadline?
- How does a short-term change affect the entire planning?

THE SOLUTION: NETRONIC VISUAL (ADVANCED) PRODUCTION SCHEDULER

Netronic's graphic planning boards offer you the possibility of visualizing a wide variety of planning areas using Gantt charts, thus ensuring that you always have an overview of all resources, capacities and orders. You can carry out planning simply by dragging and dropping and thus react faster to changes in planning. This reduces errors and ultimately saves time and money.

If none of these modules is suitable for you, but you still have a use case for a graphical planning board, please contact us and we will find a suitable solution for you based on the Netronic modules.

Netronic has developed two add-ons for the production area:

1. *Netronic Visual Production Scheduler*

The Visual Production Scheduler is Netronic's interactive graphical planning board. It is an extension (app) fully integrated into the standard production module of Microsoft Dynamics 365 Business Central/NAV.

The add-on visualizes the following parameters:

- ✓ production orders
- ✓ production order lines
- ✓ production order operations
- ✓ workstation groups
- ✓ workstations
- ✓ capacities
- ✓ shift calendars

The App also enables intuitive planning by drag-and-drop. All changes are written back to Dynamics 365 Business Central/NAV.

2. *Netronic Visual (Advanced) Production Scheduler*

The Visual Advanced Production Scheduler is an even more comprehensive graphical planning board from Netronic.

In addition to the functions of the Netronic Visual Production Scheduler, it offers:

- ✓ interactive forward planning with finite capacities
- ✓ alternative workstations
- ✓ material availability at production order level

- ✓ standby resources per workstation group
- ✓ creation of different planning scenarios
- ✓ fix operations
- ✓ meaningful color schemes

GRAPHIC PLANNING BOARD FROM NETRONIC IN COMPARISON

<i>Feature</i>	<i>Visual Production Scheduler</i>	<i>Visual Advanced Production Scheduler</i>
<i>Interactive graphical planning board</i>	✓	✓
<i>Interactive forward planning</i>	✓	✓ with finite capacities
<i>Creation of different planning scenarios</i>	-	✓
