

# orderbase MegaBoard

Graphical production planning in Dynamics 365 Business Central

As a medium-sized IT company, orderbase not only develops complete ERP systems for small medium-sized companies, but also system extensions for Microsoft Dynamics 365 Business Central or Dynamics NAV, among others.

As our partner for database-supported order processing and production control, orderbase supplies and implements complete ERP modules such as the planning board.

## YOUR CHALLENGE WITHOUT THE ADD-ON

In production planning, it is important to always have an overview of all available capacities and materials. This is a problem in many companies: Can you get an overview of the current capacity utilization situation in your system? No?

Then you are probably often confronted with bottlenecks or double loads that could easily be avoided. Outdated systems do not allow employees to react quickly enough to such planning errors or planning changes, resulting in high unnecessary costs. In addition, set-up times increase and delivery dates can no longer be met. Customer satisfaction decreases due to incorrect information and your employees are also annoyed and dissatisfied in the long term due to poor planning.

## THE SOLUTION: ORDERBASE MEGABOARD

With the add-on orderbase MegaBoard for Microsoft Dynamics NAV you make a graphical representation of the current workload situation. Furthermore, you can display capacities and loads transparently over time. In this way you receive a well-founded decision basis for all planning processes. For example, you can make better decisions in the areas of production, service or project management.

The user interface is intuitive and preparing the data is child's play. You always have a complete overview and are able to detect planning errors at an early stage using real-time data. As a result, you can make adjustments to loads and capacity immediately and with a clear conscience when planning changes occur.

### ADVANTAGES OF ORDERBASE MEGABOARD

Customer satisfaction

Simple handling

Better overview

Error reduction

## ORDERBASE MEGABOARD AT A GLANCE

---

### Features

transparent presentation of capacities and loads over time

---

graphical display of order networks and work sequences

---

display of utilization profiles of individual resources

---

automatic optimization and sequence planning

---

### Compatibility

Microsoft Dynamics 365 Business Central

---

Microsoft Dynamics NAV

---

### Price

On request (it is not possible to name the price in general, as it depends on individual requirements).

---

Changes and errors are reserved.

## ARE YOU EXCITED ABOUT ORDERBASE MEGABOARD?

Get to know orderbase MegaBoard! We can offer you the following:

-  Consulting
-  Live demo
-  Test version

Our experts will advise you, send you access data to your personal test system and/or introduce you to the tool in approx. 30 minutes without obligation and show you individual potentials for your company.

We are looking forward to your request!
