

# orderbase TreeControl

Production orders as a schematic tree in Dynamics 365 Business Central

As a medium-sized IT company, orderbase not only develops complete ERP systems for small medium-sized companies, but also system extensions for Microsoft Dynamics 365 Business Central or Dynamics NAV, among others.

As our partner for database-supported order processing and production control, orderbase supplies and implements complete ERP modules such as the planning board.

## YOUR CHALLENGE WITHOUT THE ADD-ON

*Are your production orders very complex? Do your products consist of many components and are many production steps necessary? Do you wish for more clarity?*

Some of our customers have very complex production structures and would like a better overview of components, component groups and the required operations. For these customers there is a solution.

## THE SOLUTION: ORDERBASE TREECONTROL

Orderbase TreeControl gives you a user-friendly overview of every single production order. Finally, you see it in the form of a schematic tree. In this way, your parts lists as well as the dependency of the individual component groups on each other and the operations are displayed in a simplified way.

## ADVANTAGES OF ORDERBASE TREECONTROL

Customer satisfaction

Simple handling

Better overview
