

# SNC/DATEV interface for Dynamics 365 Business Central

SIEVERS-GROUP has been providing companies and groups with holistic IT architectures for strategic corporate management for 30 years. The company employs around 300 people at four locations.

Every year, the IT consultants and system engineers develop solutions for over 1,000 customers that are precisely tailored to their needs. In doing so, they draw on individually scalable modules from a broad portfolio. This ranges from business software solutions, such as ERP, CRM or business intelligence solutions, through infrastructure offerings, such as servers and storage, to software- and hardware-supported communication systems.

## YOUR CHALLENGE WITHOUT THE INTERFACE

How is your data transfer from Dynamics 365 Business Central to DATEV? Do you still have to manually convert your data into a DATEV-compliant format? Does it cost you a lot of time on a day-to-day basis to convert data and reports into the correct format and send them to your tax advisor?

In Germany, approximately 2.5 million companies use a software solution from DATEV eG themselves or with the support of their tax advisor. DATEV has long been synonymous with IT-supported accounting. The ERP solution Dynamics 365 Business Central is also widely used, enabling companies to manage processes from the areas of purchasing, sales, logistics, production and service in addition to financial accounting.

The question is: How do you design the data exchange between the two popular programs? For an efficient workflow, it is imperative that Dynamics 365 Business Central can “communicate” with the DATEV software solution.

Rely on the certified SNC/DATEV interface for Dynamics 365 Business Central and save time that you could use much better and more value-adding for your core competencies.

## THE SOLUTION: SNC/DATEV INTERFACE BY SIEVERS

With the Microsoft-certified SNC/DATEV interface for Microsoft Dynamics 365 Business Central Cloud, you automatically convert your accounting and master data into a DATEV-compliant format. This enables direct and smooth data transfer to your tax advisor's financial accounting system – and vice versa back to you.

Absolute security is guaranteed during the data transfer. When transferring sales tax, you can also choose between the net and gross procedures.

In addition, the interface offers many other practical features, such as:

- ✓ import of posting data from DATEV-LODAS
- ✓ import of posting data from DATEV Pro
- ✓ transaction logs of the export runs
- ✓ transfer of accounts payable and receivable items into a foreign currency
- ✓ export of SEPA-compliant customer and vendor master data and G/L account labels
