

Anveo EDI Connect

Electronic Data Interchange in Dynamics 365 Business Central

The Anveo Group develops solutions to improve business processes in medium-sized companies that work with the ERP solution Microsoft Dynamics 365 Business Central (formerly Dynamics NAV/Navision). The focus is on horizontal solutions as extensions for Microsoft Dynamics, which can be used independently in projects by Microsoft Dynamics partners.

YOUR CHALLENGE WITHOUT THE ADD-ON

In many companies, lengthy communication processes with customers, partners and suppliers are still the order of the day. The main reason for this is the postal dispatch of documents and the resulting, hardly comprehensible documentation as well as a lack of up-to-date data.

THE SOLUTION: ANVEO EDI CONNECT

Electronic exchange of documents with all business partners

With Anveo EDI, you exchange electronic documents instead of paper documents. The tool allows you to automate almost all processes with your business partners. The use of Anveo EDI is conceivable for a wide variety of user groups who manage their operational processes with the help of Microsoft Dynamics 365 Business Central (formerly Dynamics NAV/Navision). Be it customers, partners, suppliers or even employees (locations and clients within the company).

You save time and resources by digitizing and automating processes and gain more control over communication and dispatch. In addition, documentation of the exchange is made easier.

Coverage of the most different file formats

The most common data formats are for example Plain-Text/CSV, UN/EDIFACT, ZUGFeRD, ASC/X12, XML, IDOC, cXML or OpenTrans.

Easy setup, speed and documentation

In addition, the tool is designed in a way that you can easily set it up and manage it yourself. We can help you with this if required and on request.

COMPARISON: ANVEO EDI CONNECT VS. SYSTEM-STANDARD

Criteria	System standard	Anveo EDI Connect
Electronic transfer of data (receipts and master data)	restricted (people format only)	✓
Automated process	– (manual steps)	✓ (Order or invoice is sent e.g. as an e-mail and automatically created as an order etc.)

ADVANTAGES OF ANVEO EDI CONNECT

Automation of processes

Saving of time

Customer satisfaction
