Drag-and-drop file upload to Dynamics 365 Business Central

ANAPTIS GMBH

Medium-sized companies from a wide variety of industries use our software to better manage their resources and processes and make them more efficient. In addition to the standard ERP solution Microsoft Dynamics 365 Business Central (formerly Dynamics NAV/Navision), we also implement industry-specific enhancements - among others in cooperation with our partners.

YOUR CHALLENGE WITHOUT THE ADD-ON

The user-friendliness of software is of great importance today. On the one hand, employees can perform productive work on a daily basis, and on the other hand, new employees can be trained easily. In the Dynamics 365 Business Central system standard, users can currently only store files as attachments in an insufficient number of places. It is also very unfavorable that the operation is not very intuitive and cumbersome.

OUR SOLUTION: ANAPTIS DROPZONE

Improve the user experience for Dynamics 365 Business Central file uploads with anaptis Dropzone. The add-on makes it possible to attach files to documents (e.g. purchase orders) via drag-and-drop (dragging files to a dedicated area in the web browser). All types are supported.

In this case, the standard functionality remains and is merely supplemented by the app.

The drag-and-drop area is initially displayed in the app standard at the places where the option of a file attachment also exists in Dynamics 365 Business Central Standard. If you

still want the functionality beyond that in other places in the system, it is very easy to add it there.

Lastly, the uploaded files can of course be downloaded or deleted.

In summary, the application offers three functions: File upload via drag-and-drop, file download and file deletion.

COMPARISION: ANAPTIS DROPZONE VS. SYSTEM STANDARD

<i>Criteria</i>	<i>System standard</i>	<i>anaptis Dropzone</i>
<i>Handling</i>	not very intuitive	intuitive (drag-and-drop)
<i>Areas for file upload</i>	limited areas	limited areas (easy customization)
